# The Future of Aviation

Tuesday, April 13, 2021

**Tuesday, April 13, 2021**

**12:00pm-1:15pm**

## Virtual Town Hall via Zoom

All money raised will benefit our chosen philanthropies – Homeboy Industries and 2nd Call

The impact of the pandemic across the whole aviation industry was immense. According to IATA, passenger air transport was down 90% year-on-year in April 2020 and still down 75% in August. However, this slowdown in travel allowed for rethinking the future of aviation.

Aviation is already known as a driving force of global technology development and innovations. As we respond to the climate emergency, new strategies are emerging: alternative fuel, electric and hybrid aircraft, and Urban Air Mobility (UAM) and Advanced Air Mobility (AAM) have the potential to create significant change. Join us to learn directly from the experts about the future of aviation and the latest technological advancements.

## MODERATOR

Justin Towles, Senior Policy Advisor  
Akin Gump

## SPEAKERS

Patrick Gruber, CEO and Board Member  
Gevo

David Reich, Deputy Executive Director,  
Mobility Planning and Strategy
